

RESUME

Name : **SABARIRAJ ALAGUCHETTI**

EDUCATION

Title of the Degree with Branch	College/University	Year of Passing
MASTER'S DEGREE (If Applicable)		
BACHELOR'S DEGREE	Kongu Engineering College	2013
XII	Senthil Matric Higher Secondary School	2009
X	Bharath Matriculation School	2007

OTHER SOFTWARE COURSES/CERTIFICATION COMPLETED THROUGH COGNIZANT ACADEMY: (if any)

No	Name of Institution (e.g. NIIT, APTECH, SSI Etc)	Diploma or Certificate	Year of Completion
1	Udemy - Complete Python Bootcamp from Zero to Hero in Python	Certificate	2020
2	Udemy - All about NodeJS	Certificate	2020
3	Udemy – Complete Data Science Bootcamp	Certificate	2021
4	Udemy - WCAG 2.1 / 2.2 Simplified with Examples	Certificate	2023
5	Server-side Tagging in Google Tag Manager	Certificate	2024
6	Udemy - Apache NiFi Complete Master Course - HDP - Automation ETL	Certificate	2024

TECHNICAL SKILLS

Hardware	
Operating System	Windows, macOS, Linux
Programming Languages	HTML5, CSS3, Bootstrap5, JavaScript, jQuery, Angular 17+, Node.js, Python, Web Accessibility, GCP - BigQuery, Cloud Run, GCS, Composer, Looker Studio, Google Tag Manager and Google Analytics, AEM Authoring
Databases & Tools	Microsoft SQL Server, MongoDB, Oracle SQL, GitHub, JIRA, Visual Studio Code and Microsoft Office Tools,
Other Utilities	AXE Dev Tools & WAVE on Accessibility
Location	Chennai

SUMMARY:

An experienced Technical Lead with over 10 years of expertise in web development and cloud data engineering, specializing in front-end design, development, and data-driven solutions. Proficient in HTML, CSS, JavaScript, Bootstrap, and jQuery, with extensive knowledge of modern frameworks like Angular. Well-versed in Google Cloud Platform (GCP) services, including Cloud Composer, BigQuery, Google Cloud Storage (GCS), and Looker Studio, with hands-on experience in building scalable data pipelines, analytics, and visualization solutions. Demonstrates a strong understanding of Google Tag Manager (GTM) and Google Analytics, enabling effective tracking and performance optimization. Skilled in technical leadership, strategic decision-making, project management, and Agile methodologies, ensuring seamless execution through code reviews, performance optimization, and team mentorship to drive successful project delivery and exceed client expectations.

EMPLOYMENT HISTORY:

Name of the Company	Designation	Address of the employer	From	To	Duration (Years)
Cognizant Technology Solutions	Sr. Associate	SBD - 3(3-6 Flr), Survey No 602/3, Plot No.1, Elcot IT/ITES - SEZ, Sholinganallur, Chennai.	22/06/2016	Till Date	8+ years
Chain-Sys India Pvt Ltd	UI Developer	85 Ponniammannagar, Ayanambakam, Chennai, Tamil Nadu 600095, India	05/05/2015	21/06/2016	1+ year
Crown Solutions India Pvt Ltd	Trainee Software Engineer	40, Sakthi Nagar, 5th Street, Thoraipakkam, Chennai, Tamil Nadu 600097, India	28/04/2014	28/04/2015	1 year

PROJECT PROFILE:

Project Title	Qatar Airways T&M
Duration	10/16/2023 - Till Date
Location	Doha, Qatar
Hardware	
Operating Systems	Windows, Linux
Programming Languages	Python, Google Cloud Platform (BigQuery, Composer, Cloud Run, GCS), Google Tag Manager, Java, Oracle

PROJECT DESCRIPTION:

This project involves the development and integration of marketing technology solutions for Qatar Airways using Google Cloud Platform (GCP), Java, and Oracle technologies. The primary focus is on feed management, advertising platform integrations, and campaign tracking to enhance targeted marketing efforts.

CLIENT DESCRIPTION:

Qatar Airways is a globally renowned airline based in Doha, Qatar, known for its premium services and extensive international flight network. The airline is investing in marketing technology to optimize customer engagement through data-driven insights.

ROLES AND RESPONSIBILITIES:

As a **Senior Associate**, the role involving following responsibilities:

In the **Feed Management Use Case**, the responsibility involves enhancing the existing affinity feed by incorporating a priority signal based on the most utilized routes from the last month. The process is carried out using GCP Composer, BigQuery, and GCS to update the feeds, which are then dropped into an SFTP server for Meta platform consumption. This role is categorized under Data Engineering.

For the **ADS + CDP Integration**, the primary responsibility includes retrieving first-party customer data, such as email IDs, from Sitecore. The data is processed and cleaned using Cloud Run before being stored in GCS. Job statuses are updated in BigQuery, and the refined data is sent to advertising platforms like Google Ads, Bing Ads, and Meta using Python client libraries. This role also falls under Data Engineering.

In the **CID Tracker** use case, the role involves developing a campaign ID generator using master data while implementing classification logic to share information with Adobe Analytics. The task requires the utilization of Angular for front-end development and Java API, along with an Oracle Database, for back-end operations. This role is classified as a Developer.

For **DCO Ads** Using DoubleClick Studio, the responsibility includes implementing Dynamic Creative Optimization (DCO) ads using Google's DoubleClick Studio. The development and management of creative assets are performed to ensure personalized ad experiences. Additionally, seamless integration with Google Ads and other platforms is managed to facilitate targeted marketing campaigns. This role is categorized as a Developer.

DURATION OF THE PROJECT:

Oct 2023 – Present | 1 year, 4 months (Ongoing)

Project Title	DX-DEL-GLBL-INVT
Duration	06/01/2022 - 10/15/2023
Location	Chennai India
Hardware	

Operating Systems	Windows
Programming Languages	Angular 10+, Node JS, MongoDB, MySQL, PHP, Python, ML Models, AWS, GCP

PROJECT DESCRIPTION:

The project was developed as an in-house tool by the Automation Team of Moment Marketing & Content Services to enhance the production process. Worked as a Full Stack Developer, building Digiapps for request and project management, the WACC Tool for web accessibility testing, and the Content Translation Engine using machine learning models. Focused on end-to-end development, deployment, and optimization of these solutions.

CLIENT DESCRIPTION:

Cognizant – Moment Marketing & Content Services, a division focused on delivering automation solutions and content services for improved operational efficiency.

ROLES AND RESPONSIBILITIES:

As a **Senior Associate**, the role involving following responsibilities:

Developed **Digiapps**, a request and project management system with a dashboard, handling requirement gathering, analysis, development, and deployment. Implemented key features such as Request Manager and Project Planner using Angular, Node.js, MongoDB, and MySQL, ensuring an efficient workflow for project tracking and management.

Contributed to the development of the **WACC Tool**, a web accessibility testing solution. Integrated the axe and wave libraries to generate detailed accessibility reports and incorporated custom modifications to enhance reporting accuracy. Utilized Angular, Node.js, MongoDB, and Selenium to ensure an effective and scalable testing framework.

Led the development and deployment of the **Content Translation Engine**, which leveraged both prebuilt and custom machine learning models to translate content with improved accuracy. Designed and implemented model training using additional datasets to optimize translation performance. Worked with Python, BERT, AWS Translation Model, Google Translation Model, Marian MT, Angular 17+, and Elasticsearch to enhance content translation capabilities.

DURATION OF THE PROJECT:

January 2022 - April 2023 | 1 year, 3 months

Project Title	DX-DEL-CS&M-PixelPerfect
Duration	02/08/2020 - 06/01/2022
Location	Chennai India
Hardware	
Operating Systems	Windows
Programming Languages	Angular 10+, PHP, MYSQL, Selenium, Galen, Java

PROJECT DESCRIPTION:

The project was developed as an in-house tool by the automation team of Moment Marketing & Content Services to enhance the production testing process. It was designed to streamline and optimize UI testing by reducing manual effort, improving accuracy, and ensuring consistency in design validation. By automating the testing process with the Galen Framework and integrating design specifications from platforms such as Zeplin, Figma, and Adobe XD, the tool significantly improved efficiency and reliability in identifying UI discrepancies across different screen resolutions and devices.

CLIENT DESCRIPTION:

Cognizant – Moment Marketing & Content Services is a division focused on enhancing marketing and content strategies through innovative technological solutions. They developed an in-house automation tool aimed at improving production testing, reducing manual effort, and increasing efficiency in UI validation across various platforms and devices.

ROLES AND RESPONSIBILITIES:

As an **Associate**, the role involving end-to-end development, deployment, and testing of the UI testing automation tool (**PixelPerfect**). This included designing the overall architecture and implementing the automation framework using Galen, integrating design specifications from tools such as Zeplin, Figma, and Adobe XD. The role also required developing a browser extension utility to automate script generation, ensuring seamless execution of UI tests against specified URLs. Additionally, it involved generating detailed HTML reports for test results, optimizing the testing workflow, and ensuring the system's reliability and accuracy throughout the deployment process.

DURATION OF THE PROJECT:

February 2020 - June 2022 | 2 years, 4 months

Project Title	K-C_FB_SLM Development
Duration	09/18/2019 - 02/07/2020
Location	Chennai India
Hardware	
Operating Systems	Windows
Programming Languages	Angular 10+

PROJECT DESCRIPTION:

K-C_FB_SLM Development involved the front-end development of a web application using Angular. The project focused on creating a user-friendly interface, implementing dynamic UI components, and ensuring seamless interaction with backend APIs.

CLIENT DESCRIPTION:

Kimberly-Clark is a multinational corporation known for its consumer products in personal care, tissue, and hygiene sectors. The company operates globally, providing innovative solutions for everyday needs.

ROLES AND RESPONSIBILITIES:

As an **Associate**, the role involved in developing and maintaining the front-end application using Angular, ensuring a seamless and responsive user interface. Responsibilities included integrating the front-end with backend APIs, implementing dynamic UI components, and optimizing performance for better user experience. Additionally, the role required conducting unit testing, debugging, and collaborating with designers and backend developers to align the application with business requirements.

DURATION OF THE PROJECT:

September 2019 - February 2020 | 4 months

Project Title	Amgen iDA Dev, Sanofi eDT – SAG, NVS-Comm-AD-SWZ-DCF eDT
Duration	08/01/2016 - 08/11/2019
Location	Chennai India
Hardware	
Operating Systems	Windows, IPAD
Programming Languages	HTML5, CSS3, JavaScript, jQuery

PROJECT DESCRIPTION:

The project involved the development of eDetailing presentations compatible with iPads across various resolutions, ensuring seamless deployment in CRM systems. Additionally, the scope included email template development and the creation of a Consent Management App to enhance customer engagement and compliance.

CLIENT DESCRIPTION:

Amgen, Novartis and Sanofi, three leading global pharmaceutical companies, required customized digital solutions to optimize their marketing and compliance processes. The focus was on improving digital communication strategies through interactive presentations and efficient consent management.

ROLES AND RESPONSIBILITIES:

As a **Program Analyst**, the role involved in developing interactive **eDetailing presentations** tailored for iPad compatibility, ensuring responsiveness across multiple resolutions. The deployment process involved integrating these presentations with CRM platforms to enhance sales and marketing effectiveness. **Email templates** were developed to align with brand guidelines and regulatory requirements, ensuring consistency and compliance. Additionally, the **Consent Management App** was designed and implemented to facilitate seamless user consent collection and management, adhering to industry standards. The role also required close collaboration with stakeholders to gather requirements, address feedback, and ensure the successful delivery of all project components.

DURATION OF THE PROJECT:

August 2016 - August 2019 | 3 years
